## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-12 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of copending Application No. 10/762,410 in view of U.S. Patent No. 6,354,147 (Gysling et al.). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of 10/762,410 discloses all of the elements of the cited claims of the instant application except for the use of a second meter portion comprising two pressure sensors. Gysling teaches the use of a second meter portion (16) comprising two pressure sensors (22,24). It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the claimed '410 system and method to include a second meter portion as taught by Gysling to provide percent composition data, since this would be advantageous in analyzing multiphase systems (see Gysling; Abstract, lines 1-15).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
